

Installation and Users Manual HS-100

Hands-free Set for Motorbike Helmets

Communication will get a lot safer with this hands-free set with waterproof PTT button, perfectly suited for two-way-radios.

HS-110 for full- face helmets

HS-130 for open/ flip-up helmets

HS-140 für Halbschalenhelme

Using the 3,5mm stereo jack you can connect two-way-radios e.g. Maycom EH-430/EH-446), wich dispose of a 3,5mm stereo jack.

The set consist in high-performance ultra flat padded speakers with special microphone for noise reduction, waterproof PTT-Button, coiled extension cable with 3,5mm phone jack (or 2,5/3,5mm two-pin-jack).

Instead of a two-way-radio you may also connect an audio device as CD-Player, MP3) with the 3,5mm jack – indeed without stereo sound.

Speakers and microphone can be easly fixed with adhesive- or Velcro tape.

Important! Pls fix the earphones in a way that your ears are not completely covered. Only this enables you to hear the outside traffice noise like car horn or police siren.

To provide best sound quality, please attach the microphone as close as possible to the mouth.

NOTE: All connections are water resistant and are marked with arrows to show how to plug into.

das Motorrad- Headset erfüllt die EMV-Normen und trägt das CE-Zeichen.
