JBL RADIAL MICRO - BLACK

JBL Radial™ Micro Blk - Performance Loudspeaker Dock for iPod

It's an iPod party machine with legendary JBL® sound. It's a space-saving, all-in-one computer sound system and iPod docking station. Connected to a TV, it's an iPod slideshow and video player. JBL Radial Micro is one of the smallest and most-versatile multimedia speaker systems ever developed. And wherever and however you use it, it's among the best-sounding systems out there. Experience clean, accurate full-frequency sound, and tight, distortion-free bass, from a compact device that looks great anywhere.

Compatibility — The JBL Radial Micro incorporates the Apple® iPod Universal Dock adapter, and is compatible with most docking versions of the iPod, including nano and 5G versions. A stereo mini jack connection allows you to enjoy high-quality audio from a variety of other devices, such as MP3 and CD players, desktop and laptop computers (all platforms), and satellite radio. An RCA video output connects JBL Radial Micro to most TV monitors.

Easy-to-Use Touch Controls — Touch Volume Control: Just a touch increases or decreases the volume. A touch on both pads mutes or unmutes the system. JBL Radial Micro also remembers your last volume setting even after the system shuts down.

Full-Navigation Remote — The IR remote control provides full access to your iPod so you can easily change tracks, browse libraries, adjust settings, and scroll through extras.

Transportable — Bring your JBL Radial Micro on the road for great sound wherever you go. The lightweight, compact sound station can provide full, rich sound in any location.

Additional Features — *OnePoint Design* — The OnePoint iPod connectors provide the connection to your computer. Connect the standard iPod cable to the rear of JBL Radial Micro and, every time you dock your iPod, you'll have a connection for synchronizing.

Evercharge Topology — The JBL Radial Micro provides power to charge your iPod when it's not connected to the computer, even if the system is off. Plug your iPod wall charger into the back of the JBL On Stage II and your iPod will charge with or without the system on.

Auxiliary audio input cable is included. The surface-gripping rubber feet provide a stable platform on

most surfaces.

Advanced Technology — The JBL Radial Micro combines many proprietary technologies to provide the highest quality sound. The JBL Radial Micro will provide astonishing bass and clear, accurate sound.

Odyssey® Transducers — The four aluminum-domed transducers are driven by powerful neodymium magnets. This design provides a full, rich-frequency response from the lowest bass to the highest highs.

COE (Computer Optimized Equalization) — The JBL Radial Micro system equalization has been computer-optimized to provide a rich, complete soundstage.

OCT (Optimized Compression Topology) — The JBL Radial Micro utilizes a proprietary compression technology to ensure clean, accurate sound at high-output levels.

SPECIFICATIONS

General

Drivers	Four Odyssey® neodymium drivers
Power Output	2 x 10 watts @ 1%THD
Frequency Response	60Hz – 20kHz
Input Impedance	>5k ohms
Signal-to-Noise Ratio	>85dB
Voltage Input	230 V AC
Dimensions	Width – 8" (200mm) Height – 8" (200mm) Depth – 3.5" (90mm)
Weight	500 g (1.1 lb)
